**(“Norcon” or the “Company”)**

**BUSINESS UPDATE**

*New Strategic Partnership in Norway  
Contract with Telenor*

Norcon plc (LSE/AIM: NCON), the global communications network specialist, is pleased to announce that it has signed a strategic partnership with Norwegian company Teleplan Consulting AS, a software solution and engineering company working with Defence, Telecom, Public and Enterprise solutions , which is a related party.

Through this partnership, Norcon has signed a contract with Telenor, one of the leading international providers of telecommunication services, to help it deploy 4G networks in Norway.

This contract is a key step in developing the business in Scandinavia and other territories around the world, and will well position Norcon to take advantage of the significant commercial opportunities associated with the network expansion and upgrades related to the 4G/LTE technology implementation.

**Arnold Rørholt, Chief Executive Officer of Norcon, commented:**

*“I am delighted to be announcing this contract signing as it is a promising sign of demand for our services to assist with the deployment of 4G networks globally and underlines our commitment to further diversify outside of the Middle East. We look forward to continuing our progress in the years ahead.”*

**About Norcon:**

Established in 1957, Norcon (LSE/AIM: NCON) has been a trusted consultant and project manager for more than half a century to the private sector and various government agencies. These organisations rely on Norcon to select, implement and maintain a communication infrastructure that not only matches, but also supports the critical needs of their operations. Norcon’s strength lies in its understanding of complex communication networks and their design.
